Summary

Hello, I am a Senior Fullstack Engineer with extensive experience in the field of Information Technology. I have strong programming skills with popular languages such as Javascript, Golang, and PHP, and experience using popular frameworks such as React, NextJS, and Laravel.

Having worked as a Technical Lead previously, I possess leadership and project management experience in addition to my technical expertise. I have developed processes and selected suitable technology solutions for products, ensuring efficient deployment and successful delivery in accordance with project plans.

In previous positions, I have provided unique technical solutions that meet customer needs, guided and trained team members to develop their skills and knowledge, and contributed to high-performing teams by fostering positive working relationships.

I am enthused by new challenges and love exploiting my experience and skill set to collaborate with individuals and organizations alike. If you are searching for a Senior Fullstack Engineer with diversity in skills and a wealth of experience, please contact me for further information.
